

**SPLASHLOGIC**

SPLASH PAD & AQUATIC PLAY CONTRACTOR

## STATEMENT OF QUALIFICATION

**WORLDWIDE TURN-KEY  
SPLASH PAD & AQUATIC PLAY  
CONTRACTOR**

# COMPANY OVERVIEW

SplashLogic is a turnkey, international splash pad installation and construction partner, serving splash pad manufacturers, municipalities, and park districts worldwide.

We specialize exclusively in the execution and installation of manufacturer-designed splash pad systems, providing a single, accountable team responsible for building systems exactly as intended.

SplashLogic was formed by the team behind Laughing Waters, Inc., a nationally and internationally recognized water feature contractor with more than two decades of experience delivering complex, public-facing fountain systems.

That experience informs everything we do — while SplashLogic itself remains intentionally focused on field execution, construction coordination, and system turnover, not system design or sales.

**Our role is simple: remove construction risk, protect the integrity of manufacturer designs, and deliver splash pads that operate safely, reliably, and predictably for the communities they serve.**

# WHO WE ARE BEST SUITED FOR

SplashLogic is best suited for projects where clarity of roles, accountability, and execution quality are critical.

We regularly partner with:

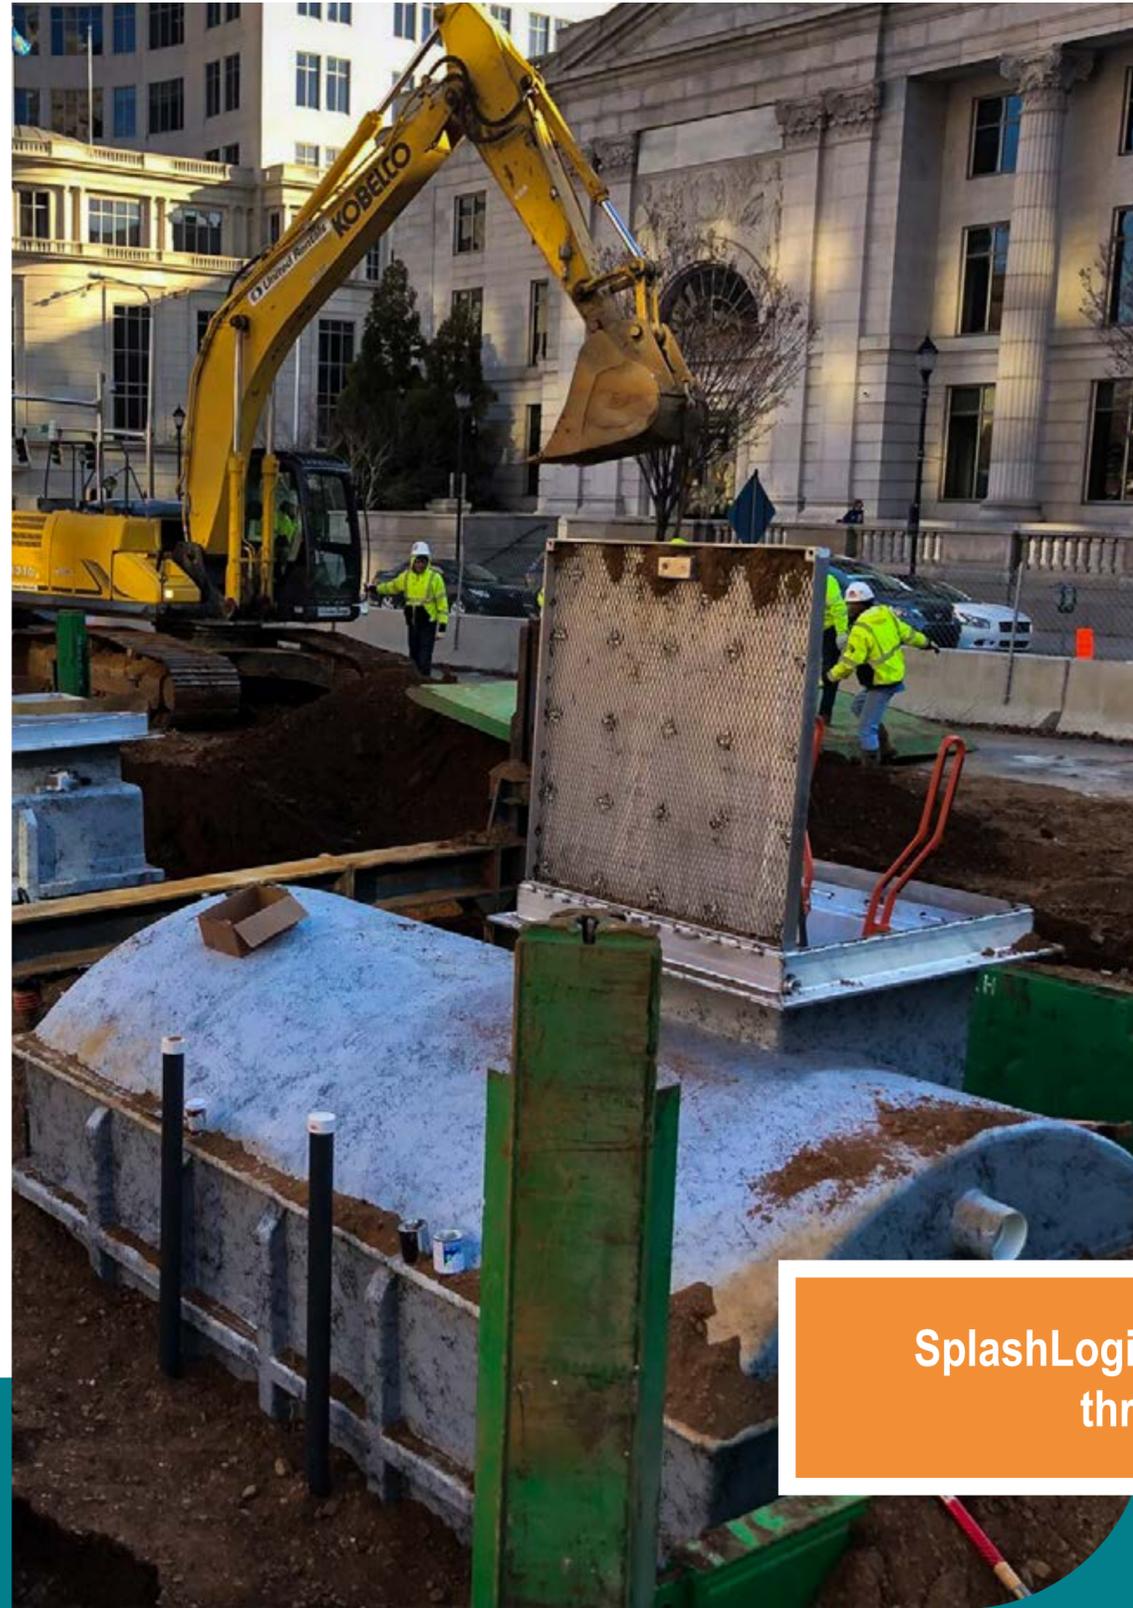

**Splash Pad Equipment Manufacturers**  
seeking a reliable, non-competitive installation partner

**Municipalities & Park Districts**  
with pre-engineered splash pad systems

**General Contractors & Construction Managers**  
coordinating public projects with interactive water features

SplashLogic is most effective on projects where the splash pad system has already been designed and engineered, and professional execution is essential to the success of the project.

# CORE SERVICES

SplashLogic provides complete, turnkey installation services for manufacturer-designed splash pad systems. We do not redesign systems or modify manufacturer intent. Instead, we focus on building each system exactly to specification.

**Our turnkey scope includes:**

- Site work coordination and excavation support
- Underground plumbing and drainage systems
- Concrete coordination and penetrations
- Waterproofing and surface preparation
- Specialty splash pad surface and flood coatings
- Fixture and spray feature installation
- Fountain equipment programming and controls integration
- Electrical coordination with project teams
- Startup, commissioning, and system turnover

This single-source delivery model reduces coordination risk, shortens schedules, and ensures consistent execution from installation through opening day.

**SplashLogic provides comprehensive aquatic play construction through a coordinated, turnkey delivery model.**

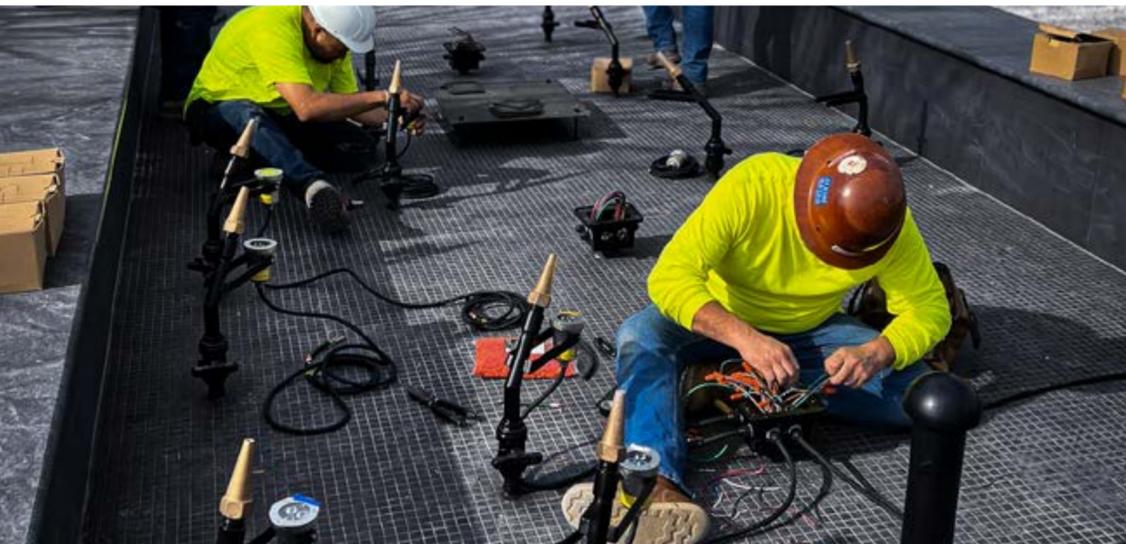

# TECHNICAL CAPABILITIES

We specialize in executing technically demanding installations where accuracy, sequencing, and coordination are essential.

SplashLogic's expertise lies in the field execution of complex, regulated splash pad systems. Our teams approach every project with a systems mindset, ensuring that mechanical, plumbing, electrical, structural, and surface elements function together reliably under real-world conditions.

## Key execution capabilities include:

- Installation of interactive splash pad systems meeting state and national safety codes
- Coordination of complex underground piping and vault systems
- Precise fixture placement, alignment, and calibration
- Fountain equipment programming and functional testing
- Cold-climate construction considerations and seasonal operation planning
- Documentation and as-built coordination for long-term maintenance

# RISK MANAGEMENT & RELIABILITY

Public splash pads demand a high level of responsibility. SplashLogic places risk management and long-term reliability at the center of every project.

Key priorities include:

- **Strict adherence to manufacturer specifications and applicable codes**
- **Clear delineation of responsibilities between manufacturer, installer, and owner**
- **Thorough startup, testing, and commissioning procedures**
- **Comprehensive owner training and documentation**
- **Long-term serviceability and access planning**

Our goal is to deliver splash pad systems that not only meet design intent, but operate safely, predictably, and efficiently throughout their lifespan.

**Our goal is to deliver aquatic play systems that not only meet design intent, but operate safely, predictably, and efficiently throughout their lifespan.**

## LEADERSHIP & TEAM

SplashLogic is led by professionals with decades of hands-on experience in water feature construction and execution. The company was founded by the leadership team behind Laughing Waters, Inc., bringing deep expertise in installation, coordination, and delivery of complex public water features.

Our extended team includes experienced project managers, field supervisors, technicians, and installers, supported by long-standing relationships with manufacturers, suppliers, and construction partners worldwide.

This depth of experience ensures accountability, continuity, and informed decision-making on every project.

## Harmony Square Fountain

Location: Tinley Park, IL  
 GC: Wegman Construction  
 Architect: Lakoda Group  
 Scope: Interactive Water Feature Installation  
 Contract price: \$1M

## City Hall Park

Location: Burlington, Vermont  
 GC: S. D. Ireland Brothers  
 Architect: Wagner Hodgson Landscape Architecture  
 Scope: Interactive water feature installation  
 Contract price: \$1M

## Festival Park

Location: Castle Rock, Co  
GC: Mortenson Construction  
Architect: Tomecek Studio Architecture & Design Workshop  
Scope: Interactive water feature installation  
Contract price: \$800,000

## Argenta Plaza

Location: Little Rock, Arkansas  
GC: Alessi Keyes Construction  
Architect: Taggart Architects  
Scope: Fountain equipment room supply and installation  
Contract Price: \$1.2M

A photograph of a splash pad in a park. Several children are playing in the water jets. A boy in a blue shirt and yellow shorts is in the center, and a girl in a colorful swimsuit is running on the right. Other people are visible in the background. The scene is bright and sunny, with trees and a brick building in the background.

## GEOGRAPHIC REACH

SplashLogic operates internationally, supporting splash pad projects across the United States and select global markets. Our teams are experienced working across diverse climates, jurisdictions, and regulatory environments, while maintaining consistent execution standards.

Whether supporting a regional park district or a national manufacturer rollout, SplashLogic delivers the same disciplined, turnkey approach.
